WEEKLY MORBIDITY REPORT
EXPLANATORY COMMENT

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

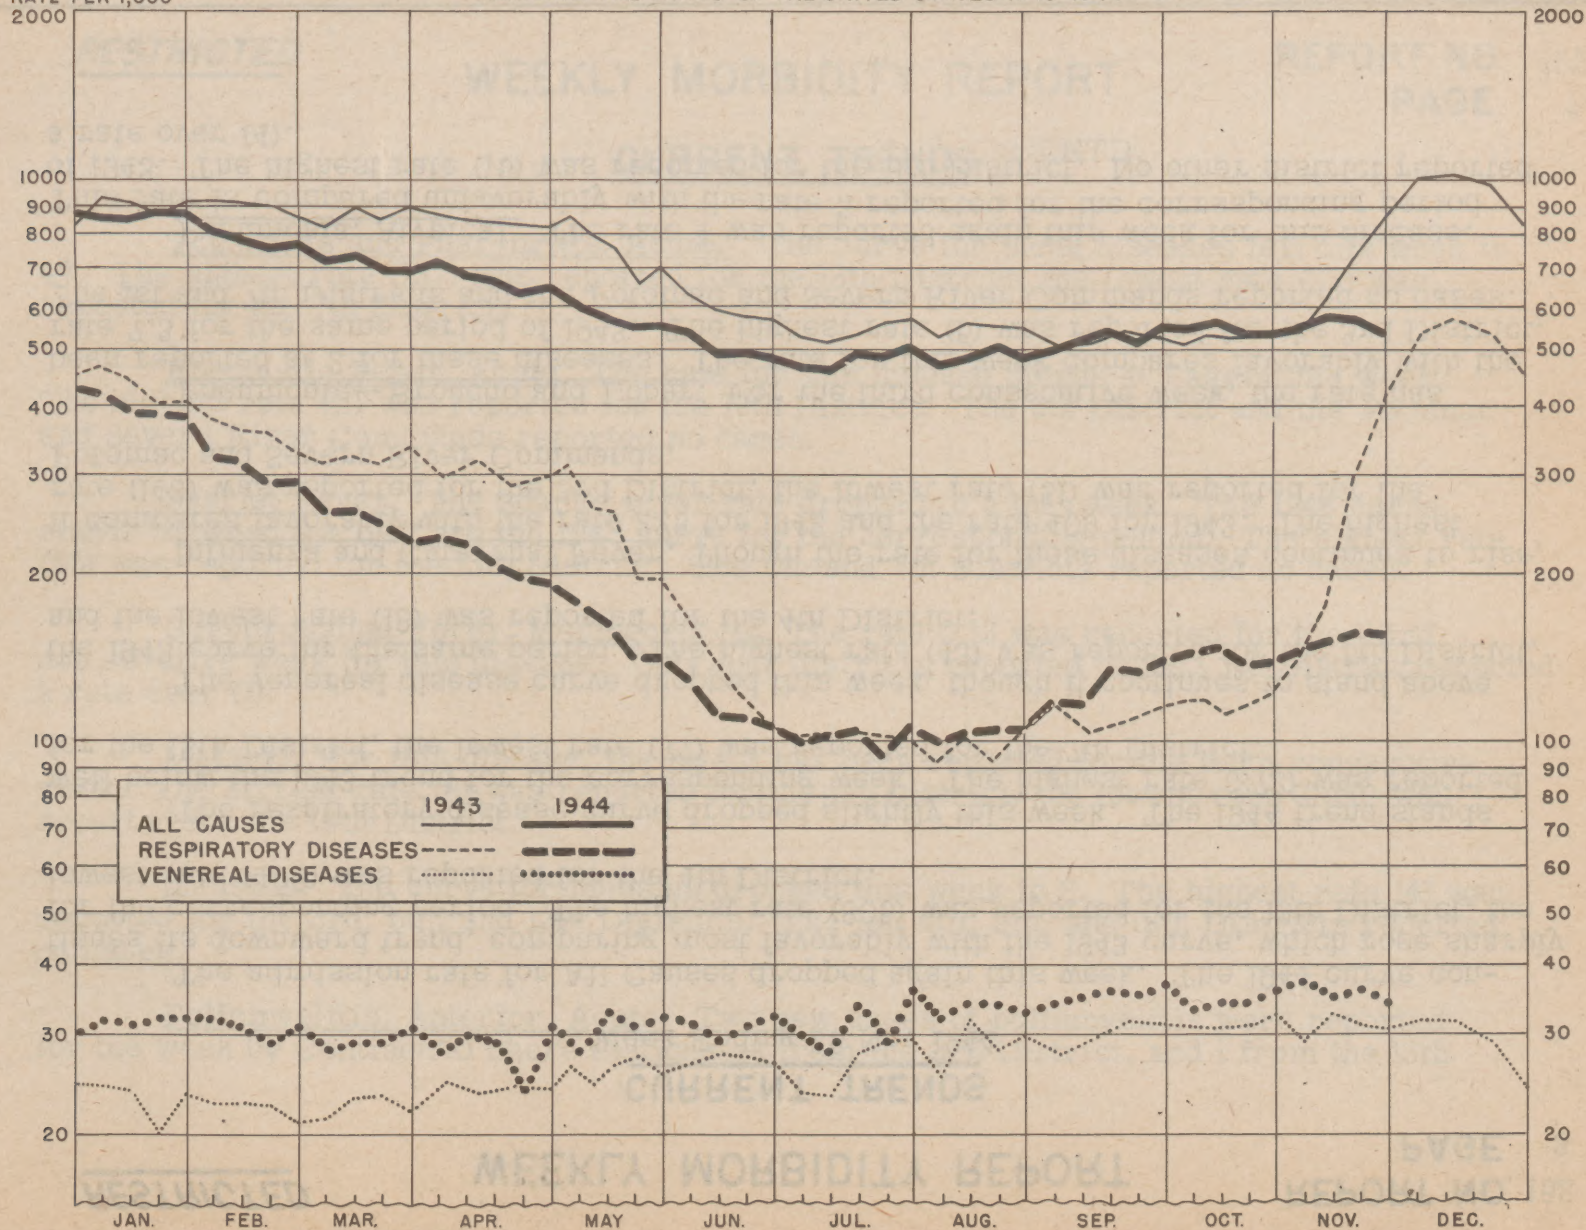

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

RESTRICTED

CURRENT TRENDS

Week Ending 25 Nov 1944

The admission rate for All Causes dropped again this week. The 1944 curve continues its downward trend, comparing most favorably with the 1943 curve, which rose sharply for the corresponding period. The highest rate (805) was reported for the 13th District, the lowest rate (408) was reported for the 4th District.

The respiratory disease curve dropped slightly this week. The 1944 trend stands well below the 1943 trend for the corresponding week. The highest rate (272) was reported for the 13th District, the lowest rate (77) was reported for the 7th District.

The venereal disease curve dropped this week, though it continues to stand above the 1943 curve for the same period. The highest rate (43) was reported for the 5th District, and the lowest rate (18) was reported for the 4th District.

Influenza and Catarrhal Fever. Though the rate for these diseases continues to rise, it compares favorably with the rate 225 for 1942 and the rate 409 for 1943. The highest rate (143) was reported for the 3rd District, the lowest rate (51) was reported for the Potomac and Severn River Commands.

Pneumonia--Broncho and Lobar. For the third consecutive week, the rate has been reported at 2 for these diseases. The rate for this week compares favorably with the rate 7.3 for the same period of 1943. The highest rate (5) was reported for the 3rd District. The 1st and 7th Districts and the Potomac and Severn River Commands reported no cases.

Pneumonia, Atypical. The rate 4 was reported again this week for this disease. This rate is compared unfavorably with the rate 3 reported for the corresponding period of 1943. The highest rate (15) was reported for the 11th District. No other district reported a rate over (4).

CURRENT TRENDS CONTD.

Tonsillitis and Pharyngitis, Acute. The curve for these diseases fell this week to 47. The highest rate (137) was reported for the 13th District, the lowest rate (21) was reported for the 7th District.

Rheumatic Fever, Acute. The rate for this disease stands at 1 again this week. The highest rate (11) was reported for the 13th District. The 6th District and the Potomac and Severn River Commands reported no cases.

Scarlet Fever. The scarlet fever rate dropped to 5 this week. The 1944 curve stands between the 1942 and the 1943 curve for the corresponding period. The highest rate (55) was reported for the 13th District. The 6th and 7th Districts reported no cases.

Cerebrospinal Fever, Meningococcic. The rate 0.13 was reported for the third consecutive week for this disease. Only four districts reported cases. No District reported a rate over (1).

Malaria. For this disease, the rate 3 has been reported for the tenth consecutive week. The highest rate (8) was reported for the 1st District, the lowest rate (0.59) was reported for the 13th District.

Measles. The curve for measles dropped this week to 2. The highest rate (4) was reported for the 3rd, 5th, and 12th Districts. The 1st, 4th, 9th, and 13th Districts reported no cases.

Poliomyelitis, Anterior, Acute. Two new cases of poliomyelitis were reported for the week by Continental Shore Stations--1 from the 3rd District, and 1 from the 13th

REPORT NO. 152
PAGE 5

CURRENT TRENDS CONTD.

District. The cumulative total of poliomyelitis cases reported from all Continental Stations Jan. 1, 1944 through Nov. 25, is 90*

The U. S. Public Health Service reports for the week show the civilian cases in the six States with the highest incidence distributes as follows:

New York	71	California	12
Pennsylvania	14	Ohio	10
Virginia	14	Oregon	10

*Several of these cases were not reported on Weekly Morbidity Report NavMed-172.
